Last updated: 7/1/24							
Study Name	Purpose	Criteria	Hopkins Patients Only?	Contact Number	Contact Person		
		HIV					
iSEE Study	To examine the effects of various factors on participation in HIV research among Black women	Black cisgender and transgender women ages 18 and older living with or without HIV, fluent in English	N	858-354-1047	Danielle Campbell		
Transgender Women Study (ACTG 5403)	To evaluate drug interactions between estrdiol and ARTs	Transgender women ages 18 and older living with HIV, must be estradiol-naïve or willing to stop then re-start estradiol	Ν	410-955-2898	Pat Fischer		
LGBTQ+ Older Adult Study	To learn how we can improve healthcare for LGBTQ+ older adults	Adults ages 55 and older living with or without HIV, self - identify as LGBTQ+, fluent in English	Ν	410-550-4453	Gabrielle Milner		
SONIC Study	To study drug use along with sleep, daily step counts, and other experiences	Adults ages 18 and older living with or without HIV, history of opioid or stimulant use, no history of injection drug us	Ν	410-955-7510	Andrea Ponce		
iHeard Study	To study how COVID-19 and other important health topics are understood and perceived in the community. To ensure residents of Baltimore have access to reliable and accurate health information.	Adults ages 18 and older with or without HIV, resident of Baltimore City, have a phone with internet access, be willing to complete weekly surveys for about 6 months	Ν	667-306-9016 iHeardBaltimore@jh.edu	Ask for iHeard Baltimore		
Long Acting Injectable Study	To gain the perspectives of those with a history of incarceration about the use of Cabenuva among persons being released from prison	Adults ages 18 and older living with HIV, incarcerated within the last 5 years, have access to a phone or computer for a remote interview	N	919-660-2210 duke.lai.study@duke.edu	Zaire Cullins		
BOBY Study	To assess uptake of Biktarvy, evaluate outcomes compared to other INSTI-based regimens, and assess patients' perspectives on Biktarvy's acceptability, adherence, side effects, quality of life and what they would change about regimen if given the chance.	Adults under 30 living with HIV; currently taking Biktarvy	N	443-287-8888	Elise Ohene-Kyei		
NAFLD Study	To study nonalcoholic fatty liver disease and HIV	Adults living with HIV; on ART for greater than 6 months; had a liver biopsy less than 6 months ago; Hep B and C negative	Y	410-955-7538	Ask for HIV NAFLD Study		
Selgantolimod Study (ACTG 5394)	To investigate a new therapy for hepatitis B for people with both hepatitis B and HIV	Adults ages 18-70 living with HIV and hepatitis B, on HIV and HBV meds for over 5 years, undetectable viral loads for both HIV and HBV		410-955-7538	Ask for Study 5394		
TAF Study	To study the effects of aging on the metabolism of tenofovir (TAF)	Adults ages 18-50 or 65-80 and living with HIV, willing to undergo rectal biopsy, undetectabe viral load for 6 months, taking a TAF-containing regimen (Descovy, Biktarvy, Symtuza, Genvoya, Odefsey)	Ν	443-287-7156	Ask for TAF study		
ALIVE	To follow current and former injection drug users over time	Adults ages 18 and older, has injected drugs	N	410-955-7510	Ask for ALIVE study		

COC4 Study	To study brain imaging with MRI in PLWH.	Adults ages 30-90 living with HIV, have an undetectable viral load, and are not using recreational substances of abuse	Ν	410-955-7311	Leah Rubin
SHARE Study	To study HIV infections and HIV therapies over a lifetime. (This is NOT a treatment study; no experimental medicines are given.)	Men living with or without HIV; ages 30-70	N	410-955-7090 866-392-8991	Ask for SHARE Study
PROSPER Study	To study how the integration of the treatment of mental health and substance use disorder (SUD) into primary care settings can effectively treat depression, anxiety, and SUD	Adults living with HIV; not taking mental health or substance use disorder medications	Y	410-401-9900	Tarfa Verinumbe Grace Lee Agha Mirza Sabiha Chowdhuri
Vancomycin Study	To learn more about allergies to the antiobiotic Vancomycin	Adults living with or without HIV; history of vancomycin use in the past five years	N	410-955-1318	Jennifer Hoffman
1More Step	To hear how women are coping with HIV by participation in interviews and focus groups	Adult black cisgender women who are living with HIV	Ν	443-681-8277	Ask for 1More Step study
EHPOC Study	To learn more about a new technology to detect HIV and syphilis and to provide linkage to PrEP/ART	Adults ages 18 and older who are living with or without HIV and are at risk for sexually transmitted diseases	N	443-540-0718 443-540-0560	Ask for Research Study
The Positively Quit Study	To support patients in their efforts to quit smoking through an online support group	Adults ages 18 and older who are living with HIV, cigarette smoker	N	813-586-4144 positivelyQuit@usf.edu	Brittani Powell
HIV NASH	To determine the prevalence of hepatic steatosis (fatty liver) in people living with HIV	Adults who are living with HIV, do not have hepatitis B or C, taking ART for > 6 months	Ν	410-955-7538	Ask for HIV NASH study
HIV Fatigue Study	To study energy and fat metabolism in the leg with MRI to determine how these factors impact the ability to walk and perform exercise and daily activities in people 60 years and older	Women ages 60 and over who are living with HIV, able to walk without cane/walker, stable ART, undetectable viral load	Ν	410-955-1160	Ask for Fatigue Study
BRAIN Study	To study brain imaging with MRI in people living with HIV	Adults ages 30-80 who are living with HIV, have suppressed viral load, not using recreational substances of abuse, and have no history of psychosis	N	410-513-9081 410-746-6072	Hannah Parker Dr. Jennifer Coughlin
AIDS Malignancy Consortium Studies	To investigate new treatments and prevention interventions for malignancies in people living with HIV (specifically lymphoma and Kaposi Sarcoma)	Adults ages 18 and older living with HIV and have lymphoma or Kaposi Sarcoma	N	410-502-5396	Laura Clark
Heart Study (Univ of Maryland Medical Center)	To study the effects of cocaine use and/or HIV infection on the heart, brain, and other parts of the body	Adults ages 18 and older who are living with or without HIV, use cocaine or don't use cocaine	N	410-706-4696 HeartStudy@IHV.UMaryland.edu	Tanya Johnson
HIV Outcomes Study	Observational study to help better understand how treatment in medical care affects the course of HIV infection	Adults ages 18 and over living with HIV and enrolled in medical care with an HIV provider in the Hopkins Barlett Clinic on or after 1/1/14	Y	410-955-6415 410-955-9872	Keyera Anderson Stacey Reese
CAM Study	To use computerized assessments to study memory, other mental abilities, and mental health in people living with HIV	Adults ages 18 and older who are living with HIV, able to use an electronic tablet	Y	443-287-4806 443-326-5842	Ekema Anjorin

MRI Study CHARM Study	To study heart vessel function using MRI to learn about the association between inflammation and increased risk of cardiovascular disease. No contrast or medications given. To understand the lived experience of Black women and their sexual health thru a 45-60 minute interview.	Healthy non-smoking adults ages 21 and older <u>OR</u> Non- smoking adults ages 21 and older who are living with HIV <u>OR</u> Non-smoking women ages 18-50 who have given birth in the last 4 months PrEP Black women, ages 18 and over, HIV(-), sexually active in past 6 months, English speaking	N	240-994-1570 443-596-4530 charm@jh.edu	Alborz Soleimani-Fard Ask for CHARM study
		HEPATITIS			
NAFLD Study	To study nonalcoholic fatty liver disease and HIV	Adults living with HIV; on ART for greater than 6 months; had a liver biopsy less than 6 months ago; Hep B and C negative	Y	410-955-7538	Ask for HIV NAFLD Study
Selgantolimod Study ACTG 5394	To investigate a new therapy for hepatitis B for patients with both hepatitis B and HIV	Adults ages 18-70 living with HIV and hepatitis B, on HIV and HBV meds for over 5 years, undetectable viral loads for both HIV and HBV	N	410-955-7538	Ask for Study 5394
Hepatitis C Study (NIH, Bethesda)	To study the course and complications of liver disease following cure of hepaitits C infection	Adults ages 18 and older who have had chronic hepatitis C for at least 6 months and are NOT living with HIV; able to travel to NIH in Bethesda	N	800-411-1222	Ask for Hepatitis C Study
Hepatitis C App Study	To get patient input on a new web-based app for people who have Hepatitis C	Adults ages 18 and older who have a history of hepatitis C and have received any care in an emergency room in the past 12 months	Y	443-202-3914	Ask for HCV App Study
		ADDICTION			
Heart Study (Univ of Maryland Medical Center)	To study the effects of cocaine use and/or HIV infection on the heart, brain, and other parts of the body	Adults ages 18 and older who are living with or without HIV, use cocaine or don't use cocaine	N	410-706-4696 HeartStudy@IHV.UMaryland.edu	Tanya Johnson
SONIC Study	To study drug use along with sleep, daily step counts, and other experiences	Adults ages 18 and older living with or without HIV, history of opioid or stimulant use, no history of injection drug us	Ν	410-955-7510	Andrea Ponce
		COVID			
ACTIV-6 COVID	To evaluate the effectiveness of repurposed medications versus placebo at decreasing symptoms for those recently diagnosed with COVID	Adults ages 30 and older who have recently been diagnosed with COVID	N	activ6study.org	Ask for COVID study
		ΜΡΟΧ			
STOMP (ACTG 5418)	To learn if tecovirimat (TPOXX) is a safe and effective treatment for human Mpox virus	Adults living with or without HIV and have been diagnosed with or presumed to have Mpox	Ν	410-955-2898	Alex Hessel

		DIABETES			
Diabetes Prevention Program	A qualtiy improvement progam to prevent or delay type 2 diabetes	Adults with pre-diabetes	N	410-614-2701 brancaticenter@jhmi.edu	Ask for Diabetes Prevention Program
		HEALTHY VOLUNTEERS			
iSEE Study	To examine the effects of various factors on participation in HIV research among Black women	Black cisgender and transgender women ages 18 and older living with or without HIV, fluent in English	Ν	858-354-1047	Danielle Campbell
Shine Study	To learn about Black women's experiences with sexual reproductive health services in Maryland	Cisgender Black women ages 18 and older, HIV(-) or unknown HIV status, and at-risk for HIV	N	410-929-0129 bdurose1@jhu.edu	Bernice Duroseau
LGBTQ+ Older Adult Study	To learn how we can improve healthcare for LGBTQ+ older adults	Adults ages 55 and older living with or without HIV, self - identify as LGBTQ+, fluent in English	N	410-550-4453	Gabrielle Milner
SONIC Study	To study drug use along with sleep, daily step counts, and other experiences	Adults ages 18 and older living with or without HIV, history of opioid or stimulant use, no history of injection drug us	Ν	410-955-7510	Andrea Ponce
iHeard Study	To study how COVID-19 and other important health topics are understood and perceived in the community. To ensure residents of Baltimore have access to reliable and accurate health information.	Adults ages 18 and older with or without HIV, resident of Baltimore City, have a phone with internet access, be willing to complete weekly surveys for about 6 months	N	667-306-9016 iHeardBaltimore@jh.edu	Ask for iHeard Baltimore
HER Experiences	To help better understand how past experiences, and where these experiences take place, impact the sexual health and well-being of young Black women in Baltimore	Black women ages 18-25 who are at risk for HIV	N	410-635-0025	Ask for HER Experiences study
SHARE Study	To study HIV infections and HIV therapies over a lifetime. (This is NOT a treatment study; no experimental medicines are given.)	Men living with or without HIV; ages 30-70	N	410-955-7090 866-392-8991	Ask for SHARE Study
Vancomycin Study	To learn more about allergies to the antiobiotic Vancomycin	Adults with or without HIV, history of vancomycin use in the past five years	N	410-955-1318	Jennifer Hoffman
CHARM Study	To understand the lived experience of Black women and their sexual health thru a 45-60 minute interview.	Black women ages 18 and over who are living without HIV; sexually active in past 6 months; English speaking	N	443-596-4530 charm@jh.edu	Ask for CHARM study
EHPOC Study	To learn more about a new technology to detect HIV and syphilis and to provide linkage to PrEP/ART	Adults ages 18 and older who are living with or without HIV and are at risk for sexually transmitted diseases	Ν	443-540-0718 443-540-0560	Ask for Research Study
Heart Study (Univ of Maryland Medical Center)	To study the effects of cocaine use and/or HIV infection on the heart, brain, and other parts of the body	Adults ages 18 and older who are living with or without HIV and use cocaine or don't use cocaine	N	410-706-4696 HeartStudy@IHV.UMaryland.edu	Tanya Johnson
MRI Study	To study heart vessel function using MRI to learn about the association between inflammation and increased risk of cardiovascular disease. No contrast or medications given.	Healthy non-smoking adults ages 21 and older <u>OR</u> Non- smoking adults ages 21 and older who are living with HIV <u>OR</u> Non-smoking women ages 18-50 who have given birth in the last 4 months	Ν	240-994-1570	Alborz Soleimani-Fard
