

Hopkins Center for AIDS Research

Open Studies

Last updated: 2/2/22

Study Name	Purpose	Criteria	Hopkins Patients Only?	Contact Number	Contact Person
HIV					
OWEL Cancer Education and Awareness Program	To understand the impact of a virtual educational intervention for breast and cervical cancer, on participants' cancer literacy	Self-identify as female; living with HIV; ages 18 and older; able to read and write in English	N	410-614-2669	Joy Chepkorir
Mpox Study	To study the clinical course and immune response of Mpox	Adults who have ever been tested or treated for Mpox; do NOT need to have been positive for Mpox	N	410-502-5396	Laura Clark
The Do IT Study (ACTG 5391)	To find out if people living with HIV who had >10% weight gain after starting an intiretroviral therapy regimen that included an integrase inhibitor in combination with TAF/FTC or TAF/3TC could gain less weight, or even lose weight, after switching to a different regimen	Women ages 18 and older who are living with HIV and not pregnant; >10% weight gain while taking an integrase inhibitor; be willing to possibly change ART regimen	N	410-955-2898	Ask for Study 5391
SHARE Study	To study HIV infections and HIV therapies over a lifetime. (This is NOT a treatment study; no experimental medicines are given.)	Men living with or without HIV; ages 30-70	N	410-955-7090 866-392-8991	Ask for SHARE Study
PROSPER Study	To study how the integration of the treatment of mental health and substance use disorder (SUD) into primary care settings can effectively treat depression, anxiety, and SUD	Adults living with HIV; not taking mental health or substance use disorder medications	Y	410-401-9900	Tricia Triece Agha Mirza
Vancomycin Study	To learn more about allergies to the antibiotic Vancomycin	Adults living with or without HIV; history of vancomycin use in the past five years	N	410-614-2724	Sandra Massih
eSHINE II	To get young adult feedback on using the MyChart patient portal	Youth and young adults ages 12-25 living with HIV	Y	443-353-9531	Ask for eSHINE II study
COVID Recovery	To follow the symptoms of COVID with interview/surveys and blood draws	Adults who are living with or without HIV who have NOT tested positive for COVID	N	443-961-4681 COVIDRecovery@jhmi.edu	Ask for COVID study
Research Study for Women	To survey women in order to create programs to increase access to medical care	Women ages 40 and older who are living with or without HIV and have Medicare, Medicaid, TAP coverage, or no insurance	N	410-550-9554	Dr. Anna Pancheshnikov
EHPOC Study	To learn more about a new technology to detect HIV and syphilis	Adults ages 18 and older who are living with or without HIV and are at risk for sexually transmitted diseases	N	443-540-0718 443-540-0560	Ask for Research Study
Beehive Study (ACTG 5379)	To study hepatitis B vaccination in people living with HIV	Adults who are living with HIV, on HIV treatment for > 56 days, CD4 > 100, Viral load < 1000, no previous hepatitis B vaccination or exposure to hep B	N	410-955-2898	Ask for Beehive Study (5379)
The Positively Quit Study	To support patients in their efforts to quit smoking through an online support group	Adults ages 18 and older who are living with HIV, cigarette smoker	N	813-586-4144 positivelyQuit@usf.edu	Brittani Powell
HIV NASH	To determine the prevalence of hepatic steatosis (fatty liver) in people living with HIV	Adults who are living with HIV, do not have hepatitis B or C, taking ART for > 6 months	N	410-955-7538	Ask for HIV NASH study
RE-AIM RESTORE	To improve the RESTORE program based on patient feedback	Bartlett Clinic patients who have used drugs in the past or currently use drugs	Y	443-297-9375	Ask for RE-AIM RESTORE

HIV Fatigue Study	To study energy and fat metabolism in the leg with MRI to determine how these factors impact the ability to walk and perform exercise and daily activities in people 60 years and older	Adults ages 45 and over who are living with HIV, able to walk without cane/walker, stable ART, undetectable viral load	N	410-955-1160	Ryan Wilde
BRAIN Study	To study brain imaging with MRI in people living with HIV	Adults ages 30-80 who are living with HIV, have suppressed viral load, not using recreational substances of abuse, and have no history of psychosis	N	443-799-7247 410-746-6072	Jason Creighton Dr. Jennifer Coughlin
AIDS Malignancy Consortium Studies	To investigate new treatments and prevention interventions for malignancies in people living with HIV (specifically lymphoma and Kaposi Sarcoma)	Adults ages 18 and older living with HIV and have lymphoma or Kaposi Sarcoma	N	410-502-5396	Laura Clark
Ms. SCORE	To find out how short-term administration of a low dose stress hormone influences memory and other mental abilities in women living with HIV/AIDS.	Women ages 18-65 living with HIV	N	443-447-5312	Chantal Riggs Isabel Santiuste
Heart Study (Univ of Maryland Medical Center)	To study the effects of cocaine use and/or HIV infection on the heart, brain, and other parts of the body	Adults ages 18 and older who are living with or without HIV, use cocaine or don't use cocaine	N	410-706-4696 HeartStudy@IHV.UMaryland.edu	Tanya Johnson
HIV Outcomes Study	Observational study to help better understand how treatment in medical care affects the course of HIV infection	Adults ages 18 and over living with HIV and enrolled in medical care with an HIV provider in the Hopkins Barlett Clinic on or after 1/1/14	Y	410-614-1281	Abi Kuforiji
LATITUDE Study (ACTG 5359)	To compare long-acting injectable to Standard of Care oral ART in previously non-adherent patients. Looking for volunteers to participate in a research study to determine if a new treatment regimen will be easier for you to follow. Participation in the study will be 2 to 3 years, HIV medications will be provided, will receive compensation and incentives	Adults ages 18 and older living with HIV, willing to take medicine by injection, history of missing clinic appointments or have an HIV viral load of 200 or greater, not pregnant or breast feeding	N	410-955-2898	Ask for Study 5359
MRI Study	To study heart vessel function using MRI to learn about the association between inflammation and increased risk of cardiovascular disease. No contrast or medications given.	Healthy non-smoking adults ages 21 and older <u>OR</u> Non-smoking adults ages 21 and older who are living with HIV <u>OR</u> Non-smoking women ages 18-50 who have given birth in the last 4 months	N	240-994-1570	Alborz Soleimani-Fard
PrEP					
PURPOSE 2	To evaluate if Lenacapavir (LEN), an investigational medicine, given every 6 months can help to reduce the chance of getting HIV through sex (PrEP, or Pre-exposure Prophylaxis)	Adults ages 18 and older; not have had an HIV test in the past 3 months; no oral PrEP in past 12 weeks or any prior use of long-acting systemic PrEP; Cisgender man, transgender or gender nonbinary individual who has receptive anal sex	N	443-275-0218 410-502-8320	Jessica Coleman Lewis
CHARM Study	To understand the lived experience of Black women and their sexual health thru a 45-60 minute interview.	Black women, ages 18 and over, HIV(-), sexually active in past 6 months, English speaking	N	443-596-4530	Ask for CHARM study
HEPATITIS					
Hepatitis C Study (NIH, Bethesda)	To study the course and complications of liver disease following cure of hepatitis C infection	Adults ages 18 and older who have had chronic hepatitis C for at least 6 months and are NOT living with HIV; able to travel to NIH in Bethesda	N	800-411-1222	Ask for Hepatitis C Study
Hepatitis C App Study	To get patient input on a new web-based app for people who have Hepatitis C	Adults ages 18 and older who have a history of hepatitis C and have received any care in an emergency room in the past 12 months	Y	443-202-3914	Ask for HCV App Study
RE-AIM RESTORE	To improve the RESTORE program based on patient feedback	Bartlett Clinic patients who have used drugs in the past or currently use drugs	Y	443-297-9375	Ask for RE-AIM RESTORE

Purge-C Study (ACTG 5380)	To treatment people recently infected with hepatitis C and determine if a shorter course of treatment will be effective if started early in the infection.	Adults recently infected with hepatitis C who living with or without HIV. May not have hepatitis A or B or other known liver disease. Able to swallow pills.	N	410-955-7538	Ask for Purge-C Study (5380)
ADDICTION					
Heart Study (Univ of Maryland Medical Center)	To study the effects of cocaine use and/or HIV infection on the heart, brain, and other parts of the body	Adults ages 18 and older who are living with or without HIV, use cocaine or don't use cocaine	N	410-706-4696 HeartStudy@IHV.UMaryland.edu	Tanya Johnson
Buprenorphine Study	To determine if smartphone-delivered incentives for buprenorphine adherence and opiate abstinence is more effective than standard buprenorphine treatment	Adults currently taking buprenorphine	N	443-608-8354	Center for Learning and Health
COVID					
SCORPIO-HR (ACTG 5407)	To find a treatment for COVID-19 symptoms	Adults ages 18 and older who are living with or without HIV; been diagnosed with COVID-19 in past 5 days and experiencing COVID-19 symptoms within past 5 days	N	410-955-2898	Alex Hessel
ACTIV-6 COVID	To evaluate the effectiveness of repurposed medications versus placebo at decreasing symptoms for those recently diagnosed with COVID	Adults ages 30 and older who have recently been diagnosed with COVID	N	activ6study.org	Ask for COVID study
COVID Recovery	To follow the symptoms of COVID with interview/surveys and blood draws	Adults who are living with or without HIV who tested positive for COVID in past 4 weeks	N	443-961-4681 COVIDRecovery@jhmi.edu	Ask for COVID study
MPOX					
STOMP (ACTG 5418)	To learn if tecovirimat (TPOXX) is a safe and effective treatment for human Mpox virus	Adults living with or without HIV and have been diagnosed with or presumed to have Mpox	N	410-955-2898	Alex Hessel
Mpox Study	To study the clinical course and immune response of Mpox	Adults who have ever been tested or treated for Mpox; do NOT need to have been positive for Mpox	N	410-502-5396	Laura Clark
DIABETES					
Diabetes Prevention Program	A quality improvement program to prevent or delay type 2 diabetes	Adults with pre-diabetes	N	410-614-2701 brancaticenter@jhmi.edu	Ask for Diabetes Prevention Program
Power to Control Diabetes Program (DECIDE)	A quality improvement initiative providing free diabetes and heart health self-care training for people with diabetes	Adults with type 2 diabetes	N	443-215-1913 DECIDENow@jhmi.edu	Tonya Bosebrough
HEALTHY VOLUNTEERS					
Mpox Study	To study the clinical course and immune response of Mpox	Adults who have ever been tested or treated for Mpox; do NOT need to have been positive for Mpox	N	410-502-5396	Laura Clark
SHARE Study	To study HIV infections and HIV therapies over a lifetime. (This is NOT a treatment study; no experimental medicines are given.)	Men living with or without HIV; ages 30-70	N	410-955-7090 866-392-8991	Ask for SHARE Study
Vancomycin Study	To learn more about allergies to the antibiotic Vancomycin	Adults with or without HIV, history of vancomycin use in the past five years	N	410-614-2724	Sandra Massih
Malaria Feeders Study	To support malaria research	Men ages 18 and older who are living without HIV and not taking any prescription or OTC meds; O+ blood type	N	443-287-7156	Ask for Malaria Feeders Study

CHARM Study	To understand the lived experience of Black women and their sexual health thru a 45-60 minute interview.	Black women ages 18 and over who are living without HIV; sexually active in past 6 months; English speaking	N	443-596-4530	Ask for CHARM study
COVID Recovery	To follow the symptoms of COVID with interview/surveys and blood draws	Adults who are living with or without HIV who have NOT tested positive for COVID	N	443-961-4681 COVIDRecovery@jhmi.edu	Ask for COVID study
Research Study for Women	To survey women in order to create programs to increase access to medical care	Women ages 40 and older who are living with or without HIV and have Medicare, Medicaid, TAP coverage, or no insurance	N	410-550-9554	Dr. Anna Pancheshnikov
EHPOC Study	To learn more about a new technology to detect HIV and syphilis	Adults ages 18 and older who are living with or without HIV and are at risk for sexually transmitted diseases	N	443-540-0718 443-540-0560	Ask for Research Study
Heart Study (Univ of Maryland Medical Center)	To study the effects of cocaine use and/or HIV infection on the heart, brain, and other parts of the body	Adults ages 18 and older who are living with or without HIV and use cocaine or don't use cocaine	N	410-706-4696 HeartStudy@IHV.UMaryland.edu	Tanya Johnson
MRI Study	To study heart vessel function using MRI to learn about the association between inflammation and increased risk of cardiovascular disease. No contrast or medications given.	Healthy non-smoking adults ages 21 and older <u>OR</u> Non-smoking adults ages 21 and older who are living with HIV <u>OR</u> Non-smoking women ages 18-50 who have given birth in the last 4 months	N	240-994-1570	Alborz Soleimani-Fard
