

# Seminar - Retrovirus Laboratory

Tuesday | June 20th, 2017 | 3pm - 4pm

*Miller Research Building Room G-01*

## Kathleen Collins, MD, PhD

*Professor*

Internal Medicine, Microbiology and Immunology  
University of Michigan, Ann Arbor

*Hosted by: Dr. Janice Clements  
Dept. of Molecular & Comparative Pathobiology*

## HIV infection of Hematopoietic Progenitor Cells

Dr. Collins earned her M.D. and Ph.D. degrees from The Johns Hopkins University School of Medicine in the Medical Scientist Training Program earning her Ph.D in the laboratory of Dr. Thomas Kelly. She received clinical training in Internal Medicine at Harvard University's affiliated Brigham and Women's Hospital. Thereafter, she was trained as an infectious disease fellow in a combined Harvard affiliated program and did postdoctoral training at Massachusetts Institute of Technology in the laboratory of the Nobel laureate, David Baltimore. After completing training, she was recruited to the University of Michigan in 1998. Her research laboratory focuses on the molecular mechanisms underlying human immunodeficiency virus (HIV) persistence.
